GÖRKEM PAŞAOĞLU

Computer Engineer / Full Stack Developer

Ankara / TR • +90 534 679 60 86

gorkempasaoglu@outlook.com • LinkedIn • GitHub

SUMMARY

Frontend Developer experienced in building responsive, SEO-friendly, and animated web applications using React and Next.js. Proficient in modern state management libraries such as Redux Toolkit and Zustand, with strong expertise in transforming Figma designs into production-ready user interfaces. Skilled in creating smooth, high-performance UI animations and scroll-based effects using GSAP and Framer Motion, delivering engaging user experiences.
 Additionally, I actively improve my backend knowledge by working with Node.js and Express.js, focusing on RESTful API integration and performance optimization.
 Contributed to large-scale dashboard, NFT, and Web3-based platform projects for enterprise clients such as TURKCELL and Garanti Bank.

EDUCATION

Kırıkkale University — Bachelor's Degree in Computer Engineering   **Eylül 2020 - Haziran 2024**
GPA: 3.20 / 4.00 — Ranked 3rd in Department, Honor Certificate Recipient

EXPERIENCE

Carna Digital   **Nov 2024 - Present**
Frontend Developer

- Developed fully responsive, pixel-perfect user interfaces based on Figma designs and deployed them to production environments.
- Built core pages and components such as Landing Page, Dashboard, Course Page, and Chat Interface from scratch using React and Next.js.
- Designed and implemented scalable, efficient state management using Redux Toolkit and Zustand across multiple projects.
- Managed RESTful API integrations and developed interactive UI components to deliver dynamic, data-driven user experiences.
- Created analytical and reporting dashboards using ApexCharts and Ant Design, improving data visualization for enterprise clients.
- Enhanced user experience (UX) through smooth, scroll-based animations and transitions built with Framer Motion and GSAP.
- Contributed to backend processes by performing small-scale enhancements and optimizations on Node.js-based services.
- Increased development efficiency by establishing design systems using Bootstrap 5 and custom CSS components for consistency and maintainability.

2C Bilgi Teknolojileri   **Jul 2024 - Jan 2025**
React Developer

- Actively contributed to large-scale enterprise projects, including TURKCELL Digital Transformation, BOTAŞ EBT, and Garanti Bank Pusula.
- Developed frontend integrations within a microservice architecture for the TURKCELL project, creating modular and fully responsive UI components.
- Established Swagger-based API connections for the BOTAŞ project, optimizing data flow and building reusable, responsive interface components.
- Redesigned the UI structure and strengthened service integrations in the Garanti Bank Pusula project, improving performance and accessibility.
- Collaborated closely with backend teams by creating and testing API endpoints using Node.js, contributing to seamless integration and system reliability.

Popupsmart   **May 2023 - Nov 2023**
Frontend Developer Intern

- Developed scalable and reusable components using React and TypeScript, optimizing loading times and improving overall application performance.
- Built SEO-friendly, observable, and low-error web applications through the use of static typing and clean architecture principles.
- Integrated the Strapi CMS into the backend to simplify content management while designing the frontend architecture from the ground up.
- Conducted small-scale Node.js integration tests to validate API data flows and optimize component-level data management.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Node.js
 State Management: Redux Toolkit, Zustand
Styling & UI: Tailwind CSS, SCSS, Bootstrap, Material UI
Libraries & Tools: GSAP, Framer Motion, ApexCharts, ESLint, Husky
Version Control & Others: GitHub, GitLab, Strapi CMS, Postman, Swagger, Agile/Scrum
