SUMMARY

I develop modern, high-performance, and scalable web applications using React, Next.js, and Node.js. I work on corporate dashboard and admin panel projects, building SEO-friendly (SSR/SSG) interfaces with 95+ Lighthouse scores. I also develop mobile applications with React Native and manage production deployments on Ubuntu servers using Nginx, SSL, and PM2. Additionally, I have built and launched a live product independently with active users.

EDUCATION

Kirikkale University • Computer Engineering

(GPA: 3.2 / 4.0 – **Department Ranking & Honor Certificate**)

September 2020 - June 2024

Military Service: Completed

EXPERIENCE

Carna Digital

November 2024 - June 2026

Full Stack Developer

- Actively contributed to 10+ professional projects, developing end-to-end solutions including Landing Pages, Chat Interfaces, and complex Admin Dashboards using the Node.js, React, and Next.js ecosystem.
- Translated Figma designs into pixel-perfect, high-performance, and fully responsive interfaces using CSS, SCSS, Bootstrap, and Tailwind CSS.
- Applied advanced optimization techniques to existing projects, achieving Lighthouse scores of 95+ and building SEO-friendly (SSR/SSG) architectures.
- Led the development and release of cross-platform mobile applications using React Native.
- Managed production environments on Ubuntu servers, configuring Nginx (Reverse Proxy), SSL certificates, and PM2 for deployment and process management.
- Designed advanced UX animations using Framer Motion and GSAP, and built analytics and data visualization dashboards with ApexCharts.

2C Bilgi Teknolojileri

July 2024 - January 2025

React Developer

- Worked in close coordination with multiple development teams using Agile/Scrum methodologies on the Turkcell Digital Transformation project, successfully managing frontend service integrations within a Micro-Frontend architecture.
- Developed highly modular and responsive reusable component libraries tailored to micro-frontend structures for the Turkcell ecosystem.
- Designed and implemented the frontend architecture and user interface from scratch for Garanti Bank (Pusula), completing all related service integrations.
- Within the BOTAŞ (EBT) project, designed admin panels and workflow management systems, optimizing Swagger-based API data flows.

Popusmart

May 2023 - January 2024

Frontend Developer Intern

- Built the frontend architecture of the content management system from scratch through Strapi CMS integration, developing scalable component libraries using React and TypeScript.
- Optimized application load times and SEO performance, improving data flow processes through Node.js-based integration tests.

TEKNİK BECERİLER

Frontend: React - React Native - Next.js - TypeScript - Redux - Zustand

Backend & DB: Node.js - .NET - Strapi CMS - REST API - Socket

UI & UX & Animation: TailwindCSS - Bootstrap - SCSS - Framer - GSAP - Radix - Apex - Ant - Shadcn

DevOps & Deployment: Ubuntu - Nginx Configuration- SSL/Certbot - PM2 - Git/GitHub Actions

Tools: GitHub - GitLab - Docker - Postman - Swagger - GitBook - Docusaurus
