SUMMARY

Computer Engineer with 2+ years of experience, working mainly with React, Next.js and TypeScript; I also build backends with Node.js and mobile apps with React Native. Developed micro-frontend architecture, admin dashboards and service integrations for the Turkcell Digital Transformation, Garanti Bank and BOTAŞ projects. I single-handedly built [modelpazarim.com](#), including web, mobile and backend, which has reached 300+ active users.

EDUCATION

Kirikkale University • Computer Engineering
(GPA: 3.2 / 4.0 – **Ranked 3rd & Honor Certificate**)

September 2020 - June 2024

Military Service: Completed

EXPERIENCE

Carna Digital
Full Stack Developer

January 2025 - June 2026

- Built landing pages, chat interfaces and admin dashboards with ApexCharts data visualization across 10+ client projects; mainly frontend, with Node.js backend work when needed.
- Turned Figma designs into pixel-perfect, fully responsive interfaces with Tailwind CSS and SCSS; added animations with Framer Motion and GSAP.
- Raised Lighthouse scores to 95+ through Next.js SSR/SSG and performance optimization, and built SEO-friendly structures.
- Developed cross-platform mobile applications with React Native.
- Handled server setup and deployment on Ubuntu servers with Nginx, SSL (Certbot) and PM2.

2C Bilgi Teknolojileri

July 2024 - January 2025

React Developer

- Developed screens and service integrations in a micro-frontend architecture on the frontend team of the Turkcell Digital Transformation project, working across multiple teams in Agile/Scrum.
- Built reusable, responsive components for Turkcell micro-frontends.
- Developed the user interface and service integrations of the mortgage tracking system in Garanti Bank's Pusula project.
- Built admin panels for BOTAŞ's personnel and task tracking system and implemented Swagger-based API integrations.

Popupsmart

May 2023 - January 2024

Frontend Developer Intern

- Set up the content management system with Strapi CMS and wrote the site's frontend from scratch with React and TypeScript.
- Improved page performance and SEO scores.

FEATURED PROJECT

modelpazarim.com • 300+ active users

- A marketplace for model vehicle collectors to buy, sell and trade; I built and launched all of it on my own, including web, mobile and backend.
- Web (Next.js): listing system, live chat, blog, news and competition modules.
- Mobile (React Native): real-time messaging, forum, user profiles and collection showroom.
- Backend (Node.js): REST API and real-time messaging and notification infrastructure with Socket.IO.

TECHNICAL SKILLS

Frontend: React - Vue - React Native - Next.js - TypeScript - Redux - Zustand

Backend & DB: Node.js - .NET - Mongo - MySQL - MsSql Strapi CMS - REST API - Socket.IO

UI & UX & Animation: Tailwind CSS, Bootstrap, SCSS, Framer Motion, GSAP, Radix UI, ApexCharts, Ant Design, shadcn/ui

DevOps & Deployment: Ubuntu - Nginx Konfigürasyon - SSL/Certbot - PM2 - Git/GitHub Actions

Tools: GitHub - GitLab - Docker - Postman - Swagger - GitBook - Docusaurus
